

## MICHIGAN'S SPECIAL ANIMALS

Endangered, Threatened, Special Concern, and Probably Extirpated

This list presents the Endangered (E), Threatened (T), and Probably Extirpated (X) animal species of Michigan, which are protected under the Endangered Species Act of the State of Michigan (Part 365 of PA 451, 1994 Michigan Natural Resources and Environmental Protection Act). The current list became effective on April 9, 2009, after extensive review by technical advisors to the Michigan Department of Natural Resources and the citizenry of the state.

Also included in this list are animal species of Special Concern (SC). While not afforded legal protection under the Act, many of these species are of concern because of declining or relict populations in the state. Should these species continue to decline, they would be recommended for Threatened or Endangered status. Protection of Special Concern species now, before they reach dangerously low population levels, would prevent the need to list them in the future by maintaining adequate numbers of self-sustaining populations within Michigan. Some other potentially rare species are listed as Special Concern pending more precise information on their status in the state; when such information becomes available, they could be moved to threatened or endangered status or deleted from the list.

### Michigan Natural Features Inventory

P.O. Box 30444  
Lansing, MI

Phone: (517) 373-1552

Fax: (517) 373-6705

This list was produced by the Endangered Species Program of the Michigan Department of Natural Resources and the Michigan Natural Features Inventory. English names in common usage or from published sources have been incorporated, when possible, to promote public understanding of and participation in the Endangered Species Program. To comment on the list or request additional copies, or for information on the Endangered Species Program, contact the Endangered Species Coordinator, Wildlife Division, Michigan Department of Natural Resources, P.O. Box 30028, Lansing, MI 48909 (517-373-1263). To report occurrences of these species, contact the Michigan Natural Features Inventory, Mason Building, P.O. Box 30444, Lansing, MI 48909-7944 (517-373-1552).

## LEGEND

### State Status

- E** Endangered
- T** Threatened
- SC** Special concern

### Federal Status

- LE** Listed endangered
- LT** Listed threatened
- LELT** Partly listed endangered and partly listed threatened
- PDL** Proposed delist
- E(S/A)** Endangered based on similarities/appearance
- PS** Partial status (federally listed in only part of its range)
- C** Species being considered for federal status

### Global Ranks

- G1** Critically imperiled globally because of extreme rarity (5 or fewer occurrences range-wide or very few remaining individuals or acres) or because of some factor(s) making it especially vulnerable to extinction.
- G2** Imperiled globally because of rarity (6 to 20 occurrences or few remaining individuals or acres) or because of some factor(s) making it very vulnerable to extinction throughout its range.
- G3** Either very rare and local throughout its range or found locally (even abundantly at some of its locations) in a restricted range (e.g. a single western state, a physiographic region in the East) or because of other factor(s) making it vulnerable to extinction throughout its range; in terms of occurrences, in the range of 21 to 100.
- G4** Apparently secure globally, though it may be quite rare in parts of its range, especially at the periphery.
- G5** Demonstrably secure globally, though it may be quite rare in parts of its range, especially at the periphery.
- GH** Of historical occurrence throughout its range, i.e. formerly part of the established biota, with the expectation that it may be rediscovered (e.g. Bachman's Warbler).
- GU** Possibly in peril range-wide, but status uncertain; need more information.
- GX** Believed to be extinct throughout its range (e.g. Passenger Pigeon) with virtually no likelihood that it will be rediscovered.

### State Ranks

- S1** Critically imperiled in the state because of extreme rarity (5 or fewer occurrences or very few remaining individuals or acres) or because of some factor(s) making it especially vulnerable to extirpation in the state.
- S2** Imperiled in state because of rarity (6 to 20 occurrences or few remaining individuals or acres) or because of some factor(s) making it very vulnerable to extirpation from the state.
- S3** Rare or uncommon in state (on the order of 21 to 100 occurrences).
- S4** Apparently secure in state, with many occurrences.
- S5** Demonstrably secure in state and essentially ineradicable under present conditions.
- SA** Accidental in state, including species (usually birds or butterflies) recorded once or twice or only at very great intervals, hundreds or even thousands of miles outside their usual range.
- SE** An exotic established in the state; may be native elsewhere in North America (e.g. house finch or catalpa in eastern states).
- SH** Of historical occurrence in state and suspected to be still extant.
- SN** Regularly occurring, usually migratory and typically nonbreeding species.
- SR** Reported from state, but without persuasive documentation which would provide a basis for either accepting or rejecting the report.
- SRF** Reported falsely (in error) from state but this error persisting in the literature.
- SU** Possibly in peril in state, but status uncertain; need more information.
- SX** Apparently extirpated from state.

Species	Family	State Status	US Status	State Rank	Global Rank
<i>Accipiter gentilis</i> Northern goshawk	Accipitridae	SC		S3	G5
<i>Acella haldemani</i> Spindle lymnaea	Lymnaeidae	SC		SH	G3
